

IDC Cleanrooms

a total solution provider

high-technology manufacturing

pharmaceuticals & biotechnology

industrial & consumer

single source cleanroom solutions

IDC Cleanrooms makes it easy for you

Whether you are installing a cleanroom or a series of cleanrooms, IDC Cleanrooms can provide you with the easiest path to that goal.

IDC Cleanrooms offers the critical elements necessary for successful cleanroom projects from design and material selection to full installation and after-market assistance, all with an unsurpassed level of service. We are specialists in cleanroom hardware and software, with expertise based on thousands of successful projects. With IDC, you won't have to spend your valuable time coordinating details. That is what we do—and we are good at it.

IDC Cleanrooms

IDC Cleanrooms has installations in every industry where pure air and tight environmental constraints are absolutely essential. Factories in microelectronics, pharmaceuticals, industrial, and consumer-related fields are the working, unceasing indicators of IDC's ability to deliver quality projects that meet your needs and exceed your expectations.

global project delivery

No matter where you are or where you plan to build, IDC Cleanrooms provides local expertise. We are everywhere, ready to be your cleanroom provider of choice.

All IDC Cleanrooms offices and construction sites are electronically connected and equipped with the latest design, scheduling, and project systems to support your needs and help fulfill your cleanroom requirements. Our worldwide staff is available to make your project a success, because your success defines our success.

providing the most

worldwide locations

- Europe: United Kingdom, Ireland, and France
- Asia-Pacific: China, Taiwan, Singapore, Japan, and Korea
- North America: Arizona, California, New Mexico, Oregon, Pennsylvania, South Carolina, and Texas

IDC Cleanrooms is your single cleanroom source. We offer design, construction, installation, and service through our worldwide network of engineers, scientists, and technicians. We understand cleanrooms and their many variations. Because of our experience, we offer proven designs, tested components, and skilled assistance in helping turn your cleanroom ideas into reality.

IDC Offices

high technology manufacturing

Microelectronics, MEMS, opto, and nanotechnology represent today's most dynamic and investment-intensive industries. Because you need your facilities to support the latest technology, you are concerned with challenges such as initial investment, running costs, cleanroom flexibility, system reliability, and fast project delivery. IDC Cleanrooms works closely with you, using our international knowledge base and systems, to help you achieve the cleanrooms that serve your needs.

innovative, cost-effective, turnkey solutions to our cu

customers is our goal

IDC Offices

pharmaceutical and biotechnology research and manufacturing

Manufacturers within the pharmaceutical and biotechnology industries must produce high-quality and low-cost products. IDC Cleanrooms' turnkey project approach will help you attain the most cost-effective delivery for your projects, ranging from research and development laboratories, to pilot plants, to volume

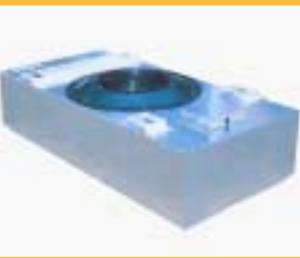

manufacturing facilities. IDC Cleanrooms will carry out a full analysis of your needs and help you in the selection of the most appropriate HVAC design and cleanroom components. We can do this while meeting your immediate needs and providing

flexibility for future technology upgrades and/or expansion. We work with you and governing agencies to integrate validation requirements (FDA/GMP) into your cleanroom throughout design and construction.

industrial and consumer products

You know that your industry requires a clean environment (Classes 10,000 and 100,000) to maintain quality and productivity by reducing rejection rates and manufacturing problems. Whether you are manufacturing LCD/flat panel displays, aerospace components, recordable media, or automotive components, you are concerned with temperature and humidity control, particle or biological contamination. IDC Cleanrooms can help you develop a new or upgrade an existing facility that can make your processes more productive and profitable.
